

U.S. Flag Will Embark On

Historic Journey

What are Nagano, Japan, Salt Lake City, Utah and Washington D.C. about to have in common?

Well, Nagano and Salt Lake are host cities for the Olympic Winter Games, but Washington D.C.? The answer: An American flag.

The stitched and embroidered banner, measuring approximately 6 by 9 feet, is about to embark on an historic journey that will find it flying over some impressive places at all three sites over the next eight or nine months.

"By having it flown over the nation's Capitol in Washington D.C. and Utah's Capitol in Salt Lake, we're adding lots of historical value to the flag," explains Tom Welch, president and chief executive officer of the Salt Lake Organizing Committee for the Olympic Winter Games of 2002 (SLOC). "By March of 2002, that flag will have been on display and flown over some significant and historical places. Its journey over the next four or five years will one day make it an interesting museum piece for future generations to ponder and

The new Daniels Port of Entry weigh station cost \$1.3 million to build.

New Weigh Station Ready To Open

Truckers traveling along U.S. Highway 40 will soon be passing through a new weigh station scheduled to open this month. The new building now features an 1,800 square foot facility, automated with computers—something the previous weigh station did not have. The building is also safer. Designers specifically setback the building 100 feet away from the high-

way for safety reasons after passing vehicles mistakenly repeatedly passed through the old station. A 14-foot scale will also replace an outdated 10-foot scale. The station will be used to monitor truck weight and will be operated by the Utah Department of Transportation. Cop Construction is overseeing the building of the new facility.
